Teaching:

I developed and have taught in the graduate level oncology advanced practice specialty program. This includes clinical mentorship in the clinical rotations and both of the required oncology nursing theory courses. In addition to lecturing on cancer and tobacco content in other courses, I facilitate clinical placements and provide mentorship for oncology nurse practitioner/clinical nurse specialist graduate students. I also contribute oncology content to core courses in the Master's program on health promotion. I now teach the core courses on health promotion for the Master's Entry into Practice Program and for the Advanced Practice Students.
